Coding scheme FAM

1. Use both manuals for coding the items of the HCR-20 (items H6-H10 with the additional guidelines in the FAM) and the items of the FAM.

2. Mark (a maximum of 6) critical items for the HCR-20 and FAM: which items are the most important risk factors for this woman?

3. Make the final risk rating for violence to others.

4. Make the three additional risk ratings (experimental):
   - Self-destructive behavior (e.g., self-harm, suicide attempt)
   - Victimization (e.g., victim of domestic violence)
   - Non-violent criminal behavior (e.g., property offenses, fraud)

Note. For more detailed instructions see Coding procedure (p. 33). Further, it is advised to also examine protective factors, for example, with the SAPROF.
